Cc: Josh Joseph <josh.joseph@yu.edu>

Dear Professor Berger,

I am hoping you will take an interest in this matter because I believe it sheds light on the Holocaust. In Nazi Germany, no one was ever forced to kill anyone. However, there were severe penalties for telling about the murders. In the 21st century, the entire scientific establishment in the U.S. is helping to cover up a mistake the *American Journal of Physics* made in publishing an absurd article about evolution and thermodynamics. The article undermines the integrity of science and gives Islamic terrorists real evidence that American is the "Great Satan." The article reminds me of the famous Piltdown Man hoax. The attached certificate of mailing is for an ignored request to explain this matter to the President of Yeshiva U.

To understand this hoax, it helps to understand why the theory of intelligent design is a scam perpetrated by those for and against ID. I explain my point of view in this 3-minute podcast:

<https://www.buzzsprout.com/16377/143091-the-intelligent-design-scam>

This is a letter I wrote to Congressman Yvette Clarke (D-NY, 9th district) about the evolution hoax:

Dear Ms. Clarke,

In a telephone conversation in April 2013, your communications director (Scott) indicated he would be my advocate in getting the *American Journal of Physics* to retract a malicious article ("Entropy and evolution") that promotes atheism. It was written by Daniel F. Styer, a physicist at Oberlin College, and was peer-reviewed.

Scott initially refused my request, but had a change of mind when he saw the document with exhibits I sent him. My correspondence with your office is at

<http://newevangelist.me/2013/04/12/national-science-foundation/>

A version of the article by Granville Sewell in Exhibit No. 1 was published last year in a peer-reviewed journal. It has the same title as the Styer article and is at

<http://bio-complexity.org/ojs/index.php/main/article/view/BIO-C.2013.2>.

Also, I discussed the article with Professor Styer and exchanged emails with him on December 23, 2013.

Apparently, Professor Styer did not know about my correspondence with the *American Journal of Physics*, which started in February 1, 2012, until he got my email dated June 28, 2013.

Dr. Styer did not admit that he misused the Boltzmann equation for entropy. However, he was unable to discuss the article in a rational manner. When I asked Dr. Styer what the entropy of a pendulum was, he replicated the absurdity of the article itself by saying, "Zero." The AJP article disgraces every physicist in the United States, and shows how irrational people can be about anything connected to belief in God.

Very truly yours,

David Roemer

Mailed with a certificate of mailing, faxed, and emailed.

Faxed to Beth Cunningham, American Association of Physics Teachers, and Julie Schmidt, American Association of University Professor

This is my letter to the AAUP:

<http://newevangelist.me/2013/12/16/letter-to-the-american-association-of-university-professors/>

My letter to the Father General of the Order of Jesuits is here:
<http://newevangelist.me/2013/06/21/priests/>

I have also contacted Senator Charles Schumer about this matter, and have asked him to assign a caseworker. If this request is ignored, I will file an ethics complaint against Senator Schumer.

Very truly yours,
David Roemer
