Dear Mr. Roemer,

That link worked, thanks. However, I reject the notion that NCSE has any duty to comment there.

You are also mistaken in thinking that evolution violates the second law of thermodynamics. There is an ample literature on the topic; see, e.g., Emory F. Bunn, "Evolution and the second law of thermodynamics," *American Journal of Physics* (2009) 77(10):922-925.
