Dear colleague,

Thank you very much for your submission of an abstract for the ESSSAT conference in Lodz/Warsaw, Poland 2016.

We received a high number of submissions. Though trying to do our best and include as many submissions as possible, we unfortunately were not able to accept all of them. Some of the refused papers were even relevant for the conference. When that's been said, some papers were also refused due to lack of relevance, the science-theology focus, or the paper was delivered too late.

Thus, on behalf of the Scientific Committee I have to inform you that your proposed contribution to the 16th *European Conference on Science and Theology* (ECST XVI) in Poland, unfortunately has **not been accepted** by the Scientific Committee.

Nevertheless, you are, of course, welcome to participate at the conference and to join the discussions with people from all over the world who are interested in the dialogue between science and theology.

Kind regards

Dr Knut-Willy Sæther

Scientific Programme Officer

ESSSAT, ESCT XVI
