

I have communicated with you a number of times about this scandal:

https://www.academia.edu/20939526/An_Analogy_Between_Nazi_Germany_and_the_United_States

The article explains why an absurd article about evolutionary biology in a peer-reviewed physics journal is not being retracted. Also see "Pseudoscience in the American Journal of Physics" (<http://www.pseudoscience123.com>).

Two other articles I wrote about science and religion are

https://www.academia.edu/25681124/Science_Metaphysics_Philosophy_Theology_History_and_the_Holy_Shroud

https://www.academia.edu/23340072/WHY_PEOPLE_BELIEVE_GOD_CAUSED_THE_BIG_BANG

The first explains why the Shroud of Turin was probably created by Gnostics in the 1st or 2nd century using methods that have been lost in history. See "Canonical Complaint Against Cardinal Dolan: Science and the Catholic Church" (<http://www.dkroemer.com>).

The second gives a psychological explanation for why people think the scientific arguments for God's existence make sense. See "Rational Arguments For God's Existence: Evangelizing Is Good and Proselytizing Is Bad" (<http://www.newevangelist.me>).

I had a two-hour interview with James H. Fetzer on May 16. It was his 200th show and is titled, "Science and Religion."
